ALDREN L. LETADA
Quiot, Cebu City, Philippines
Software Engineer | C++, .NET Developer
Email: letadaaldren@gmail.com | **Phone**: +63 908 243 8802
LinkedIn: linkedin.com/in/aldren-letada | **GitHub**: github.com/GarudaKurt
Portfolio: https://aletadadeveloper.vercel.app/

Software Engineer with nearly 4 years of experience developing backend services, web applications, and enterprise software solutions using C# and ASP.NET Core. Experienced in designing and maintaining RESTful APIs, and business applications within Agile development environments.

In addition to backend development, I bring a strong foundation in firmware and embedded systems development, including developing and maintaining enterprise printer firmware fleet solutions at Lexmark. Skilled in troubleshooting complex technical challenges and delivering reliable, scalable, and maintainable software solutions.

TECHNICAL SKILLS

Programming Languages:
C#, C++, C, JavaScript, Python, Java, Delphi

Backend Technologies:
ASP.NET Core MVC, Entity Framework, RESTful APIs, Node.js, Express.js

Frontend Technologies:
React.js, Next.js, Bootstrap, HTML5, CSS3, Tailwind CSS, shadcn/ui.

Databases:
SQL Server, MySQL, PostgreSQL, SQLite, Firebase, Supabase

Mobile Development:
React Native, Expo

Embedded Systems:
Arduino, ESP32, STM32, Raspberry Pi

Tools & Platforms:
Git, GitHub, GitLab, Bitbucket, Azure DevOps, Docker, Linux, Jenkins, Postman, Swagger, Figma, Notion

Firmware Tools:
Yocto, Coverity, Valgrind, GDB, CMake

Professional Experience

Lexmark and Research and Development Corporation
Firmware Engineer
August 2022 – October 1, 2025 | Full-time
Employment Technologies:
C/C++, Python, CMake, Git, Gitlab, Gerrit, Coverity, Valgrind, Jenkins, Bash/Shell Scripting

Responsibilities:

- Developed and maintained firmware fleet components for enterprise printers.
- Implemented and maintained firmware components for enterprise printers, contributing to system stability and feature enhancements.
- Performed debugging and performance optimization using **Valgrind and GDB**.
- Collaborated with cross-functional teams in an Agile development environment.
- Conducted static code analysis using **Coverity/Unit Test/Integration** to ensure software quality
- Participated in Code Reviews.

Aldesa BPO Inc.
Software Engineer
October 6, 2025 - April 30, 2026 | Full-time
Employment Technologies:

HTML5, CSS3, Bootstrap, jQuery, JavaScript, C#, ASP.NET MVC, Entity Framework, SQL Server, Postman, Bitbucket

Responsibilities:

- Developed and maintained CRM application modules using C# ASP.NET MVC, improving workflow efficiency and supporting daily operations for internal users.
- Performed API testing using Postman and Swagger.
- Data migrations
- Microservices
- Database Management
- SQL Scripts Optimization
- Agile
- Collaborated with developers and QA engineers to identify and fix defects.
- Participated in code reviews and maintained version control using **Bitbucket**

Soft Skills

- Problem-Solving and Analytical Thinking
- Attention to Detail
- Technical Documentation and Reporting
- Adaptability and Continuous Learning
- Debugging and Troubleshooting Skills

November 2022 – Present

Freelance Software Developer

November 2022 – Present

Developed web, mobile, desktop, and embedded solutions for various clients using C#, ASP.NET Core, React, React Native, and embedded technologies.

Key contributions:

• Developed REST APIs and backend services.

• Built web applications.

• Develop Database Design Architecture

• Built mobile applications using React Native.

• Designed embedded Automation and IoT solutions.

• Mentored students on software engineering and embedded systems projects.

Education Bachelor of Science in Computer Engineering | June 2022
University of Cebu – Main Campus

Certifications and Awards

• Best Thesis Award, Computer Engineering Department and 3rd placer in overall engineering research forum

Thesis: Entrance Gate System for Covid-19 Health Monitoring in University of Cebu – Main Campus

Led a team in developing a complete prototype that included both hardware and software. Used Delphi for the desktop application and Arduino for the embedded system. Also helped build the website front end using React.js.

- 3rd Place, Engineering Research Summit Recognized for outstanding project execution and innovation across the entire Engineering Department.
