

ALDREN L. LETADA

Quiot, Cebu City, Philippines

Software Engineer | Firmware Engineer

Email: letadaaldren@gmail.com | **Phone:** +63 908 243 8802

LinkedIn: linkedin.com/in/aldren-letada | **GitHub:** github.com/GarudaKurt

Portfolio: <https://aletadadeveloper.vercel.app/>

I have almost four years of experience in the IT industry, specializing in firmware and embedded systems development using C/C++. My background includes developing and maintaining embedded solutions for Lexmark printers, with a strong focus on low-level programming, backend integration, and hardware-software interaction.

In addition, I have experience in full-stack web development using ASP.NET Core MVC and Entity Framework at Aldesa BPO Inc..

I am also a freelance developer with experience in Embedded Systems, IoT, AI, web applications, and mobile app development.

TECHNICAL SKILLS

- Programming Languages:
C, C++, C#, Python, Delphi, Java and JavaScript
- Front-End Frameworks:
Bootstrap, React.js and Next.js
- Back-End Frameworks:
NodeJs, ExpressJs, C#, [Asp.net](https://asp.net) Core MVC and Entity Framework and RESTFul APIs
- Database:
MySQL, SQL Server, SQLite and Firebase
- Mobile Technologies:
React Native, Expo

- Web Technologies:
HTML5, CSS3, Tailwind CSS, shadcnUI, daisyUI and Bootstrap
- Delphi Development
VCL (Visual Component Library), FireMonkey (FMX), REST Components, DataSnap, FastReport, Serial Communication, Arduino Integration, TComPort, ComPort Library, FireDAC, SQLite Integration, SQL Server Integration.
- Embedded Systems:
Arduino, ESP32, STM32 and Raspberry Pi
- Tools & Platforms:
Git, Linux, Version Control, Docker, Figma, GitHub, GitLab, Azure, DevOps, Bitbucket, Notion
- Tools:
Yocto, Jenkins, Coverity, Valgrind and GDB

Professional Experience

Lexmark and Research and Development Corporation

Firmware Engineer

August 2022 – October 1, 2025 | Full-time

Employment Technologies:

C/C++, Python, CMake, Git, Gitlab, Gerrit, Coverity, Valgrind, Jenkins, Bash/Shell Scripting

Responsibilities:

- Developed and maintained firmware fleet components for enterprise printers.
- Implemented backend logic in **C/C++** for embedded systems.
- Performed debugging and performance optimization using **Valgrind and GDB**.
- Collaborated with cross-functional teams in an Agile development environment.
- Conducted static code analysis using **Coverity/Unit Test/Integration** to ensure software quality
- Participated in Code Reviews.

Aldesa BPO Inc.

Software Engineer

October 6, 2025 - April 30, 2026 | Full-time

Employment Technologies:

HTML5, CSS3, Bootstrap, jQuery, JavaScript, C#, ASP.NET MVC, Entity Framework, SQL Server, Postman, Bitbucket

Responsibilities:

- Developed and maintained CRM web application features using **C# ASP.NET MVC**.
- Performed API testing using **Postman**.
- Data migrations
- Microservices
- Database Management
- SQL Scripts Optimization
- Agile
- Collaborated with developers and QA engineers to identify and fix defects.
- Participated in code reviews and maintained version control using **Bitbucket**

Soft Skills

- Problem-Solving and Analytical Thinking
- Attention to Detail
- Strong Communication Skills
- Technical Documentation and Reporting
- Adaptability and Continuous Learning
- Time Management and Task Prioritization
- Debugging and Troubleshooting Skills
- Fast Learner and Self-Motivated

Freelancer – Embedded & Software Developer

November 2022 – Present

Developed desktop, web, mobile, embedded, and IoT solutions for freelance clients and startup projects. Worked across full-stack development, backend APIs, firmware programming, and system integration.

Technologies

HTML5, CSS3, Bootstrap, JavaScript, TypeScript, React.js, Next.js, Node.js, React Native Expo, Python, Django, SQLite, MySQL, SQL Server, Firebase, GitHub, C, C++, Delphi, Arduino, STM32, ESP32, Raspberry Pi

Key Projects & Responsibilities

- **Developed desktop applications using Delphi, including:**
 - **Library Management System**
 - **Textbook Management System**
 - **Queuing System**
 - **Pharmacy Management System**
 - **Inventory Management System**
- **Built REST APIs and backend services for web and desktop applications.**
- **Developed startup mobile applications using React Native Expo and Firebase, including bill-splitting applications.**
- **Designed and implemented embedded and IoT systems using Arduino, ESP32, Raspberry Pi, and C/C++.**
- **Mentored students on capstone and final-year projects involving:**
 - **Embedded Systems**
 - **IoT**
 - **Artificial Intelligence**
 - **Web Applications**
 - **Mobile Applications**

Education Bachelor of Science in Computer Engineering | June 2022
University of Cebu – Main Campus

Certifications and Awards

- **Best Thesis Award, Computer Engineering Department**

Thesis: Entrance Gate System for Covid-19 Health Monitoring in University of Cebu – Main Campus

Led a team in developing a complete prototype that included both hardware and software. Used Delphi for the desktop application and Arduino for the embedded system. Also helped build the website front end using React.js.

- **3rd Place, Engineering Research Summit Recognized for outstanding project execution and innovation across the entire Engineering Department.**
- **Certificate of Appreciation for mentoring student**
